

Customer Option Package

**GERM
FIGHTER
ONE**

This Germ Fighter One package is a complete whole room sterilising system for the elimination of viruses and bacteria in enclosed interior spaces, capable of achieving 99.9999% of all germs destroyed – a Sterility Assurance Level of Log 6.

It provides the only dry mist sterilising system that is EPA Registered - EPA# 84526-1-6 - and is certified to both AMS 1550B and Boeing D6-7127 requirements.

EU Biocide Article 95 Compliant.

Halo Hypersteriliser

Precision machine that dry mists measured interior spaces with ionised hydrogen peroxide – ensuring 100% dispersal to the limits of walls, ceiling and floor, sterilising the airspace, all exposed surfaces – including underneath and behind objects – as well as penetrating deep into cracks, crevices and other inaccessible places.

Quantity: 1

Hyper-6 Whoosh sterilising fluid

Mild and non-hazardous 6% solution of hydrogen peroxide boosted with colloidal silver. When ionised it produces further antimicrobials – hydroxyl radicals, oxygen species, nitrogen species, ozone and ultraviolet – greatly multiplying performance and effectiveness.

Quantity: 4 x 5 litre bottles

Full face mask set

Safe filtered breathing to prevent inhalation of hydrogen peroxide during sterilising operations. Provides 95% filter efficiency against solids, liquid aerosols and certain organic vapours. NIOSH approved: OV/P95

Quantity: 1

Draeger H2O2 detection meter

Precision monitoring of hydrogen peroxide presence

Quantity: 1

Cobra mains operated ULV Mister

Generates mist of low temperature hydrogen peroxide vapour. Ideal for hand-held follow-up in spaces not exposed to whole room treatment – eg storage cupboards, aircraft seat pockets etc

Quantity: 1

Neogen ATP detection meter

Measures adenosine triphosphate (ATP) levels to determine presence of pathogens before and after treatment. Reads results in less than 20 seconds. Includes 100 test samplers.

Quantity: 1

Smoke detector cover

Moulded cup fits over most types of smoke detector to avoid triggering alarm while sterilising is in progress. Adjustable telescope pole reaches ceiling to floor to hold in place.

Quantity: 2

HVAC vent cover

Seals ceiling vents to avoid shutting down heating or air conditioning while sterilising is in progress. Adjustable telescope pole reaches ceiling to floor to hold in place.

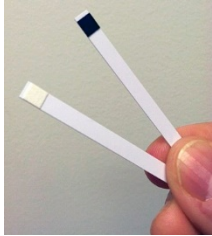

Quantity: 3

Laser measure

Precision measurement of room spaces to calculate optimum hydrogen peroxide dose.

Quantity: 1

H2O2 spread detection strips

Distributed through the target room prior to treatment. Confirms chemical exposure to hydrogen peroxide, thus verifying mist spread is complete.

Quantity: Box of 100

Back-up power cord

Always handy on the go. Spare 5-metre mains lead for Hypersteriliser unit.

Quantity: 1

Hyper-4 Wipe-Out sterilising spray

Contact surface steriliser for in-between and back-up applications to main treatment. Achieves 99.99% of all germs destroyed – a Sterility Assurance Level of Log 4.

Quantity: 10 x 1 litre squeeze-packs

Hyper Policy Professional insurance

Unique and essential policy exclusively created for Hyper Hygiene customers using the Hypersteriliser. Covers public and product liability, including goods in transit for first year of operation.

Quantity: 1

Full operator and hygiene training

As required to qualify for insurance cover. Leads to recognised certification and license to operate all equipment.

Quantity: 1
